

GrowSmart BY CADABAM'S CDC

A developmental screening programme for schools — a clinician-reviewed growth report for every child aged 2–6.

Every child
grows differently.
Now you'll know *how yours
does.*

A personalised growth report for every child in your school — reviewed and approved by a Cadabam's CDC clinician.

It's not a test. It's a snapshot of *how your child
learns, communicates and experiences the world.*

Sits on top of your curriculum

Nothing about the school day changes.

Runs on a phone

Parents complete it in about 30 minutes.

A clinician approves every report

The AI assists. It does not decide.

WHAT IT LOOKS AT

Language & communication

Cognitive development

Social & emotional

Behaviour

Sensory & motor

Self-help skills

Who it's for

Whole classes, ages 2–6 — or specific children a teacher has flagged.

HOW IT WORKS

A whole school, screened in about *a week*.

- 01 The school sets up its screening room
- 02 Parents complete the screening — about 30 minutes
- 03 Our clinicians review every response
- 04 Each family gets a report, with home activities
- 05 Support is arranged for the children who need it

WHAT A REPORT SAYS

Thriving

Developing as expected. Activities to keep the momentum going.

A little attention

A couple of things worth watching.
Nothing to worry about.

Early advantage

Specialist support would help. Not a diagnosis — an opportunity.

The goal is not to label children. The goal is *early understanding*.

3 decades of expertise

5+ Bengaluru centres

Multidisciplinary team

**Bring GrowSmart
to your school.**

A personalised growth report for every child, this year.
